

Table 3. Total fatty acid (FA) and long-chain fatty alcohol (FAIc) content ($\mu\text{g mg}^{-1}$) and composition (wt.%) of diets and faeces of Atlantic salmon freshwater pre-smolts and seawater post-smolts fed dietary fish oil or *Calanus* oil. Means of 3 replicates \pm S.D.

	Content of dietary lipid ($\mu\text{g mg}^{-1}$)			Composition of dietary lipid (wt. %)			Composition of freshwater pre-smolt faeces (wt. %)			Composition of seawater post-smolt faeces (wt. %)		
	Fish oil		<i>Calanus oil</i>	Fish oil		<i>Calanus oil</i>	Fish oil		<i>Calanus oil</i>	Fish oil		<i>Calanus oil</i>
	FA	FA	FAIc	FA	FA	FAIc	FA	FA	FAIc	FA	FA	FAIc
